LIBRARY
U. S. DEPARTMENT OF AGRICULTURE

Vol. 1, No. 8.

WASHINGTON, D. C.

March, 1932.

Air conditioning.

Air conditioning. By William Hull Stangle. Part XVI. Water and steam piping. By Realto E. Cherne. Heating and Ventilating. v.29, no.2. February 1932. p.54-58.

Air conditioning for small homes. By C. Arnold Hall. American Home. v.7. no.2. November 1931. p.99-100, 118.

Fundamentals of air conditioning. By F. B. Rowley. Domestic Engineering. v.138, no.2. January 23, 1932. p.28-29, 107.

Heating and air conditioning for homes outlined in conference reports. Heating and Ventilating. v.29, no.2. February 1932. p.41. President's Conference on Home Building and Home Ownership.

Home air conditioning -- its problems and possibilities. By Henry R. Sewell. Domestic Engineering. v.138, no.2. January 23, 1932. p.21-23, 108.

Humidification for residences. By A. P. Kratz. Domestic Engineering. v.137, no.7. December 26, 1931. p.28-30, 116.

Mechanical or ice refrigeration for air conditioning? By Leon Buehler, Jr. Power. v.75, no.10. March 8, 1932. p.360-362. Some economists even prophesy that this infant industry will lead the way out of the depression.

Small air conditioning jobs. By C. E. Scott. Refrigerating Engineering. v.23, no.1. January 1932. p.15-16, 29.

Associations.

Officers re-elected at Annual Meeting of American Standards Association. American Standards Association Bulletin. v.3, no.1. January 1932. p.29.

W. S. Lee, New President of American Engineering Council. Power Plant Engineering. v.36, no.4. February 15, 1932. p.187-188.

Building construction.

Architectural details; frames. 1931. 46 plates. Millwork Institute of California. Fresno, California.

Concrete ashlar walls. By Wal-Ward Harding. Chicago, Portland Cement Association, 1932. 15p.

Building construction. (Cont'd)

Foundations for farm and village dwellings. Report submitted to President's Conference on Home Building and Home Ownership by Committee on Farm and Village Housing. December 1931. 5p. mimeographed. U.S. Dept. of Agriculture, Bureau of Agricultural Engineering.

New type fireproof construction. General Building Contractor. v.3, no.1. January 1932. p.28-30.

New type of brick wall construction will help sell products. Brick and Clay Record. v.80, no.2. February 1932. p.89-90. Dublin Wall 12 inches thick.

Properties of fiber building boards. By C.G. Weber, F.T. Carson, and L.W. Snyder. 1931. 14p. U.S. Bureau of Standards. Miscellaneous Publication no.132.

Specifications for structural steel for buildings. American Institute of Steel Construction, Inc. 2d ed. N.Y., 1929. 62p.

Corrosion.

Solubility of metals in milk:- II. Submerged corrosion tests of various metals in milk. By H.T. Gebhardt and H.H. Sommer. Journal of Dairy Science. v.15, no.1. January 1932. p.42-61.

Cotton.

Common errors in cotton production. By O.F. Cook. 1932. 26p. U.S. Department of Agriculture. Farmers' Bulletin no.1686.

Cotton growing in California. By H. H. Schutz. International Cotton Bulletin. v.10, no.38. January 1932. p.195-198.

Cotton harvesting by mechanical methods. By H. B. Walker. Implement Record. v.29, no.3. March 1932. p.16-17.

Hibernation of the cotton boll weevil under controlled temperature and humidity. By Edgar F. Grossman. 1931. 19p. Florida Agricultural Experiment Station Bulletin no.240.

Secretary Hyde on acreage reduction. International Cotton Bulletin. v.10, no.38. January 1932. p.198-205.

Some facts about the cotton outlook for 1932. 1932. 8p. U.S. Department of Agriculture. Miscellaneous Publication no.139.

Treating cotton seed by the dusting method. By Naomi C. Woodroof. 1931. 16p. Georgia Experiment Station. Bulletin no.170.

Dairy equipment.

Producing milk of good quality. By Henry B. Morrison. 1931. 14p.
Kentucky. College of Agriculture. Extension Division. Circular no. 249.

Dams.

Economies in dams designed for increase in height. By Calvin V. Davis. Engineering News-Record. v. 108, no. 8. February 25, 1932. p. 292-293.
Designing and building foundations and substructures of dams with provisions for adding to height in future leads to major economies when increased capacity is needed.

Hardy dam provides 40,000 Hp. for Michigan peak loads. By Edward M. Burd. Power Plant Engineering. v. 36, no. 5. March 1, 1932. p. 194-198. Earth dam 120 ft. high on sand and mudstone foundations with buried penstocks and concrete overflow weir. Cross section through Hardy dam, showing intake works, penstocks, power house and general construction of dam.

Minor repairs restore usefulness of earth dam in Arizona. Engineering News-Record. v. 108, no. 10. March 10, 1932. p. 356-357. Neglected dam of irrigation concern now in state ownership. New earth placed, tunnel lined, gates repaired, and spillway enlarged.

Drainage.

Engineers discuss drainage and flood control. Engineering News-Record, v. 108, no. 9. March 3, 1932. p. 337.

Land drainage works in the middle level districts of the Great Ouse Catchment basin. Journal of the Ministry of Agriculture. v. 38, no. 9. December 1931. p. 893-894.

Electricity on the Farm.

Application of hydro-electric power to farm work. Hydro-electric Power Commission of Ontario. Bulletin. v. 19, no. 1. January 1932. p. 14-19.

Electricity -- the silent servant. By G. W. McCuen. Successful Farming. v. 30, no. 3. March 1932. p. 9, 51.

Practical farm utilization of electricity. By I. P. Blauser. Farm Implement News. v. 53, no. 7. February 18, 1932. p. 15.

Rural service increases sevenfold in six years. Electrical World. v. 99, no. 7. February 13, 1932. p. 298. Figures from Public Service Company of Northern Illinois.

Underground vs. overhead distribution for residential areas. Electrical World. v. 99, no. 9. February 27, 1932. p. 411. Table gives comparative costs of overhead and underground construction for isolated, isolated neutral, and common neutral systems.

Electricity on the farm. (Cont'd)

West slope farmer harnesses windpower: Electricity for light and operating small motors cheaply generated. By A. H. Gerbaz.
Western Farm Life. v.34, no.2. January 15, 1932. p.3, 9.

Erosion.

Control soil erosion by crops, terraces, and dams. By O.R. Zeasman.
1931. 31p. Wisconsin College of Agriculture. Extension Service. Circular no.249.

Extension.

County organization and management. Address by Robert H. Tucker.
Extension Division News. Virginia Polytechnic Institute.
v.14, no.5. March 1932. p.1-3.

Some essentials in economic extension. By Nils A. Olsen. Extension Service Review. v.3, no.2. February 1932. p.17-18.
Pt.1. Understanding of world forces.

Farm buildings.

Farmhouses. By H. B. White. and L. W. Neubauer. 1931. 24p.
University of Minnesota. Agricultural Extension Division. Special Bulletin no.142.

Housing and house operation costs on Nebraska farms. By J.O. Rankin.
1931. 4lp. Nebraska. Agricultural Experiment Station Bulletin 264.

Milk houses. By W.C. Krueger. 1932. 24p. New Jersey
Agricultural Experiment Station. Extension Service. Extension Bulletin no.93.

Our new seven room farm home. By Dan Scoates. Progressive Farmer.
v.47, no.2. January 15-31, 1932. p.12.

Plans and plantings for Georgia homes. By H. W. Harvey. 1931.
35p. Georgia. State College of Agriculture. Extension Division. Bulletin no.402.

Farm machinery and equipment.

Advantages of modern power farming. By J. W. Housfield. Tractor Farming.
v.17, no.1 and 2. January - February 1932. p.10-11.

Can I use profitably today the farm machinery of yesterday? I. Farm machinery of yesterday. By F. A. Wirt. Better Farm Equipment and Methods. v.4, no.7. March 1932. p.6-7. Fundamental factors determining proper and profitable use of farm machinery.

Farm machinery and equipment. (Cont'd)

Care of the milking machine. By Harold Macy. 1931. 8p. University of Minnesota. Agricultural Extension Division. Special Bulletin no.138.

Characteristics of feed mill performance. By E. A. Silver. Agricultural Engineering. v.13, no.2. February 1932. p.31-34. Great deal of standardization work could be done on hammer mills. Before much of this work can be accomplished it seems that the A.S.A.E. should formulate some program for carrying it on. With proper coordination some very valuable contributions could be made, not only for the benefit of manufacturer but farmer as well.

Combine harvesting in 1931. By W. H. Cashmore and J. E. Newman. 1932. 10p. Occasional notes on mechanised farming. no.1. Institute for Research in Agricultural Engineering. University of Oxford.

Cutting the cost with good equipment. By Research Department National Association of Farm Equipment Manufacturers. Farm Implement News. v.53, no.8. February 25, 1932. p.14-15.

Engineers study machine needs of southern farms: Department of Agriculture Press Release. Farm Implement News. v.53, no.8. February 25, 1932. p.17. Agricultural machines developed or improved by the Bureau of Agricultural Engineering to aid farmers in reducing production costs include a forage drier, cotton planter, two seed-cotton driers and a fertilizer distributor.

Equipment for the farm garden. By E. T. Leavitt. Farm Implement News. v.53, no.6. February 11, 1932. p.16.

Farm machine prices: Editorial. Western Farm Life. v.34, no.4. February 15, 1932. p.4.

Farm profits rest on efficiency. By E. T. Leavitt. Implement and Tractor Trade Journal. v.47, no.4. February 13, 1932. p.11, 31. Progress in mechanical equipment is enabling farmer to lighten depression by decreasing cost of production.

Frasen - Ersatz. Von Chas. W. Arens. Technik in der handwirtschaft. v.12, no.8. August 1931. p.223-227. Harrow substitutes. Describes various American, English and German methods of attempting to granulate furrow slices as they are plowed.

Future of farm equipment business. Address by Alexander Legge. Hardware and Implement Journal. v.37, no.3. March 1932. p.13-14.

German "Combine" development. By H.H. Stippler. Agricultural Engineering. v.13, no.2. February 1932. p.35-36. Cheaper, lighter, more versatile -- allows gradual and economic adjustment to new plan of farm organization.

Farm machinery and equipment. (Cont'd)

Gigantic plow to reclaim land. Implement Record. v.29, no.3.
March 1932. p.15.

Good machinery makes a good farmer better: Modern equipment has increased efficiency and reduced production costs. By E. T. Leavitt.
Western Farm Life. v.34, no.4. February 15, 1932. p.3, 15.

Grasmaher - Untersuchungen. Von W. Kloth. Technik in der Landwirtschaft. v.12, no.8. August 1931. p.232-235. Mower tests. Includes description of I.H.C. mower with gears running in oil. Shows how efficiency of mower which was dirty and poorly oiled was increased some 30% by cleaning and proper oiling.

H. J. Res. 272. 72d Congress. 1st Session. Directing the Federal Trade Commission to investigate and report to the Senate cause or causes for high prices of agricultural implements and machinery. February 2, 1932. 3p.

Junking the junk on farms. Farm Implement News. v.53, no.10.
March 10, 1932. p.16-17.

Machinery more important than ever to farm success: Production on lower basis of cost now recognized as only solution of agriculture's economic inequality with industry. Implement and Tractor Trade Journal. v.47, no.4. February 13, 1932. p.12-13, 32.

New design for combine cylinders. By Otto Schnellbach. Agricultural Engineering. v.13, no.2. February 1932. p.36.

New equipment gives promise of better times. By E. T. Leavitt.
Utah Farmer. v.25, no.13. February 10, 1932. p.3, 8.

Operation of rice driers in California with low air temperatures. By George P. Bodnar. Agricultural Engineering. v.13, no.2. February 1932. p.45-46.

Opportunity is presented for equipment industry to lead the nation back to lasting prosperity. Northwest Farm Equipment Journal. v.46, no.2. February 1932. p.11-13. Equipping American farms to produce at minimum costs would eliminate waste, increase profits and put country's agriculture on sound economical basis. General conditions would improve with renewed employment in factory, mine and forest.

Paris farm equipment exposition. Farm Implement News. v.53, no.10. March 10, 1932. p.17.

Price paid for modern equipment. By E. T. Leavitt. Farm Implement News. v.53, no.7. February 18, 1932. p.12-13. It is not a farm expense but an investment which pays big dividends in reduced cost of production.

Farm machinery and equipment. (Cont'd)

Research problems in artificial drying of forage crops. By W.M. Hurst. Agricultural Engineering v.13, no.3. February 1932. p.46. Unless such feed can be produced at a lower cost with an artificial drier than it can be produced by natural drying, or unless a product of such superior quality can be obtained, there seems to be but a limited field for artificial drying.

Some facts about farm machine prices. By Finley P. Mount. Tractor Farming. v.17, no.1, and 2. January - February 1932. p.3-8.

Some mechanical prune pickers. Pacific Rural Press. V.122, no.22. November 28, 1931. p.505.

Standardization of farm implements: Editorial. Implement and Machinery Review. v.57, no.682. February 1, 1932. p.972-973.

Tillage implements kill weeds. Oregon Farmer. v.54, no.5. February 4, 1932. p.10. Illustration of rod weeder drawn by power tractor.

Uncle Sam ready to aid farmers: Sixty-Million -dollar fund now available does not apply to purchase of machinery but will finance tractor operations. Implement and Tractor Trade Journal. v.47, no.5. February 27, 1932. p.9.

Where roughage grinding pays. By E. T. Leavitt. Implement and Tractor Trade Journal. v.47, no.4. February 13, 1932. p.15. Costs of meat production materially reduced by use of ground alfalfa or fodder, Nebraska feeding experiments show.

Fences.

Modern fences: They help us produce livestock with greater economy. By Dan Scoates. Progressive Farmer. v.47, no.3. February 1-14, 1932. p.4.

Fertilizers.

Care of pastures and pasture fertilization. By Dr. Firman E. Bear. American Fertilizer. v.75, no.7. September 26, 1931. p.11-12, 45.

Conservation of fertilizer materials from minor sources. By C.C. Fletcher. 1932. 7p. U.S. Department of Agriculture. Miscellaneous Publication 136.

Fertilizer and fertilizer material. 1931. 167 p. Alabama Dept. of Agriculture and Industries Department Bulletin no.19.

Observations on the use of commercial fertilizers on the arid soils of Utah. By D.W. Pittman and Clarence B. Winham. 1932. 24p. Utah. Agricultural Experiment Station. Bulletin no.233.

Proper care of manure is important. By Stanley M. Powell. Michigan Farmer. v.178, no.3. January 16, 1932. p.5.

Fertilizers. (Cont'd)

Research and demonstrations--Foundation of progress. By H.R. Smalley. American Fertilizer. v.75, no.2. July 18, 1931. p.13-16, 40-44.

Soil improvement work of the N. F. A. Brief review of some of the outstanding activities of the staff for the past few years. American Fertilizer. v.75, no.3. August 1, 1931. p.15-18, 44-50. Fertilizer application; cooperative projects; pasture fertilization.

Trend of fertilizer practice with reference to citrus culture in Florida. By J. J. Skinner. American Fertilizer. v.75, no.4. August 15, 1931. p.13-14, 36-40.

Filters and filtration.

Filter sand studies. Water Works and Sewerage. v.79, no.2. February 1932. p.43-46.

Flood control.

Early Mississippi flood stages not alarming. By Brig. Gen. T.H. Jackson. Engineering News-Record. v.108, no.10. March 10, 1932. p.373. Present stages compared with those of 1929 and with maximum probable flood show ample safety margin.

Engineers named to make study of flood control. Engineering News-Record. v.108, no.9. March 3, 1932. p.335.

Frost protection.

Blower for protection against frost. Electricity on the Farm. Merchandising Supplement. v.5, no.2. February 1932. p.S6-S10.

Fuels.

Heat content of fuel. Power Plant Engineering. v.36, no.5. March 1, 1932. p.200.

Short cuts to combustion efficiency with natural gas. By L.C. Price. 1931. 23p. Arkansas. Engineering Experiment Station. Circular no.3.

Unbiased fuel comparisons. By J. George Kohl. Fuel Oil. v.10, no.9. March 1932. p.11-12, 74-77.

Greenhouses.

For winter gardening build a greenhouse of your own. By Llewellyn Price. American Home. v.7, no.2. November 1931. p.112,133.

Heating.

Application of refrigeration to heating and cooling of homes. By A.R. Stevenson, Jr., F. H. Faust and E.W. Roessler. Refrigerating Engineering. v.23, no.2. February 1932. p.83-90.

Basic laws and data of heat transmission. By W. J. King. Mechanical Engineering. v.54, no.3. March 1932. p.190-194.

Friction in tees. By F.E. Giesecke, and W.H. Badgett. Domestic Engineering. v.138, no.4. February 20, 1932. p.46-49, 105-106.

Heating in residences and small structures. Pt.VI. By H.L. Alt. Domestic Engineering. v.137, no.7. December 26, 1931. p.43-47, 117. Hot water circulating systems.

Principles of calculation of low-temperature radiant heating. By A. H. Barker. Heating and Ventilating. v.29, no.2. February 1932. p.48-53.

Some pointers in heating with gas. By F.S. Roche. Domestic Engineering. v.138, no.4. February 20, 1932. p.77-79.

Hotbeds.

Electric hotbeds, cold-frames, propagating benches and open soil heating. National Rural Electric Project Reports no.5 and 6. 1932. Sect.I. Recommended construction and use. 8p. Sect. II. Investigations and research. 36p.

Electrically heated germinators. Electricity on the Farm. Merchandising Supplement. v.5, no2. February 1932. p.S6-S10. Eliminates defective seed; temperature control; tray construction; some operating costs

Soil heating investigations. Agricultural Engineering. v.13, no.2. February 1932. p.41. From 1931 progress report, Washington Committee on the Relation of Electricity to Agriculture.

Houses.

Comparative costs of the walls of country houses. By H. Vandervoort Walsh and Alexander T. Saxe. Pencil Points. v.13, no.2. February 1932. p.93-95.

Lumber dealers to market trade-marked homes: "First National Home", a complete unit to be subject of National Merchandising program. Printers' Ink. v.157, no.13. December 24, 1931. p.50-52.

Mass-production homes. By Gove Hambidge. v.101, no.12. December 1931. p.10-11.

Promoting home-ownership plans: Tangible, beneficial results of President's Conference on Home Building and Home Ownership are appearing says Conference Secretary. Commercial Standards Monthly. v.8, no.8. February.1932. p.245-246.

Houses. (Cont'd.)

Representative plans for farm houses. Extract from report submitted to President's Conference on Home Building and Home Ownership by the Committee on Farm and Village Housing. 1931. 8p. mimeographed. U.S. Bureau of Agricultural Engineering.

Some proposed standard measurements for kitchen equipment. By Deane G. Carter. Agricultural Engineering. v.13, no.2. February 1932. p.42-44.

Income, farm

Cash farm income for current crop year. Farm Implement News. v.53, no.8. February 25, 1932. p.11. Estimate from Brookmire Economic Service, Inc.

Farm profits and factors influencing farm profits on 176 dairy farms in Hunterdon County. By Allen G. Waller and Emil Rauchenstein. 1932. 32p. New Jersey. Agricultural Experiment Station Bulletin no.534.

Insulation.

Aluminum foil as truck body insulation. By Max Breitung. Refrigerating Engineering. v.23, no.1. January 1932. p.27, 42.

Properties of metal foil as an insulating material. By J.L. Gregg. A.S.R.E. Convention preprint. January 26, 1932. p.1-2.

Irrigation.

Farm bureau sponsors irrigation farmers conference. Utah Farmer. v.25, no.14. February 25, 1932. p.4, 15.

Irrigated crop rotations in western South Dakota. By Stephen H. Hastings and Beyer Aune. 1932. 46p. U.S. Department of Agriculture. Circular no.188.

Methods of alleviating water shortages on irrigation projects. By G. D. Clyde. Agricultural Engineering. v.13, no.2. February 1932. p.37-41. 1. Watershed management. 2. Water-supply forecasts. 3. Supplemental water supplies by pumping. 4. Replenishing ground water supplies artificially. 5. Improved methods of distribution and application of water on the farm. 6. Fall and winter irrigation.

Land.

Back to the farm! By John Fields. Printers' Ink. v.157, no.10. December 3, 1931. p.96-97. Land bank official tells how land values will be stabilized and prices elevated.

Land.

(Cont'd.)

- Federal and state land policies affecting agriculture. Washington, D. C., Chamber of Commerce of the U. S. Agricultural Service Department. 1932. 36p.
- Research in agricultural land utilization: Scope and method. N.Y., Social Science Research Council. Advisory Committee. 1931. 201p. Bulletin 2.
- Surplus busting by land utilization. By A. G. Rinn. California Cultivator. v.78, no.4. January 23, 1932. p.80-81.

Miscellaneous.

- Agronomic work of the Big Spring, Tex., field station --1915-1929. By F.E. Keating. 1932. 32p. U.S. Department of Agriculture Circular no.202.
- Annual report. 1930-1931. Ohio. Agricultural Experiment Station. Bulletin 497. 1932. 201p.
- Application of color measurement in the grading of agricultural products. By Dorothy Nickerson. 1932. 36p. mimeographed. U.S. Department of Agriculture, Bureau of Agricultural Economics. A preliminary report.
- Architectural acoustics. By Paul B. Heyl. 1931. 8p. U.S. Bureau of Standards. Circular no.396.
- Bibliography of North American Geology, 1929 and 1930. By John M. Nickles. 1931. 280 p. U.S. Geological Survey. Bulletin no.834.
- Biennial report. 1929-1930. Kansas. State Board of Agriculture. 1931. 669p. Devoted to the state's rural conditions and their improvement, to the raising of better crops and livestock, together with agricultural and other statistics.
- Certification and labeling activities in 60 commodity fields. By P.G. Agnew and J.W. McNair. American Standards Association. Bulletin v.3, no.1. January 1932. p.1-23. Factual survey of methods and results of certification and labeling in the marketing of commodities as practiced by trade and technical associations and governmental bodies.
- Farm life under the old system and the new Russia. By D.W. Pittman. Utah Farmer. v.25, no.13. February 10, 1932. p.14-15, 19.
- Farm plants and new items. By Roy Dickerson. Printers' Ink. v.156, no.8. August 20, 1931. p.96-97, 100-101.
- Function of research in engineering education. By Professor Dugald C. Jackson. Science. v.74, no.1912. August 21, 1931. p.183-187.
- George Washington -- America's first agricultural engineer. By M.A.R. Kelley. Agricultural Engineering. v.13, no.2. February 1932. p.29-30.

Miscellaneous. (Cont'd)

How loans will be made to farmers from reconstruction fund.
Hardware and Implement Journal. v.37, no.3. March 1932.
p.20.

How should motor trucks be taxed? By Dr. George F. Warren.
American Agriculturist. v.129, no.4. January 23, 1932.
p.55. Brief article in which question is raised "Whether
tax should be based on possession or on use."

Investigation of air flow in open-throat wind tunnels. By
Eastman N. Jacobs. 1929. 11p. National Advisory
Committee for Aeronautics. Report no.322.

Kinematics of machinery. By C.D. Albert and F.S. Rogers.
N.Y. John Wiley & Sons, Inc., 1931. 527p.

Making farm plans for 1932: First business of farming is to
make the living. By D. P. Trent. 1932. 7p.
Oklahoma. Agricultural and Mechanical College. Ex-
tension Service. Circular no.291. Rigid economy should
be practiced, expenditures should be made only for necessities,
further indebtedness should be religiously avoided, instal-
ment buying should be discouraged, and in every way possible
we should strive to improve our financial standing.

Now plan for farm relief: Editorial. Farm Implement News.
v.53, no.6. February 11, 1932. p.10.

1932 Agricultural outlook for California. 1932. 85p.
California. Agricultural Extension Service. Circular no.59.

On improvement of air flow in wind tunnels. By C. Wieselsberger.
1928. 9p. National Advisory Committee for Aeronautics.
Technical Memorandums. no.470.

Regulations relative to U.S. loans to farms. Farm Implement
News. v.53, no.10. March 10, 1932. p.14-15. State-
ment by Secretary of Agriculture.

Relief by law a myth: Experience shows farm prices cannot be
maintained in face of chronic over-production--an interview
with James C. Stone. By O.S. Granducci. Farm Journal.
v.56, no.3. March 1932. p.7-8, 46.

Study of open jet wind tunnel cones. By Fred E. Weick. 1927.
15p. National Advisory Committee for Aeronautics. Tech-
nical notes. no.260.

Survey of storage conditions in libraries relative to the preser-
vation of records. By Arthur E. Kimberly and J.F.G. Hicks,
Jr. 1931. 8p. U.S. Bureau of Standards. Mis-
cellaneous Publication no.128.

Miscellaneous. (Cont'd)

- Tests of freight containers. Engineering News-Record. v.108, no.8.
February 25, 1932. p.294. Final tests included: 1. Stream of water under high pressure to determine watertightness. 2. Loaded containers mounted on cars driven against bumper block at 6 m.p.h. 3. One end lifted 20 in. and then suddenly dropped. 4. Concrete blocks of 12 $\frac{1}{2}$ tons weight were dropped upon containers. 5. Containers were loaded into ship to determine facility of handling and stacking as cargo.
- Two years of the Department of Interior: 1929-1931. Address by Hon. Ray Lyman Wilbur. May 2, 1931. 1931. 9p.
- Usefulness of mathematics to engineers. By P.W. Ott. 1932. 15p. Ohio. Engineering Experiment Station. Circular no.27.
- Vegetable growing in Maine. By Richard M. Riley. 1932. 28p. Maine. College of Agriculture. Extension Service. Bulletin 203. Discusses paper mulch, irrigation, soils and soil preparation.
- Vertical belt drives. By W. F. Schaphorst. Power Plant Engineering. v.36, no.4. February 15, 1932. p.164-165.
- Whose fault? By C. F. Hirshfeld. Mechanical Engineering. v.54, no.3. March 1932. p.173-180. Major ills of world today and for some time past are due largely to those of us who have advanced science and the application of science, and who have almost criminally refused to give serious thought to the collateral results.

Potatoes.

- Cold storage of potatoes. By Willis J. Williams. Refrigeration, Cold Storage and Air Conditioning. v.2, no.9. December 1931. p.21-22.
- Irrigating potatoes with a porous canvas hose. By O. E. Robey. Quarterly bulletin. Michigan Agricultural Experiment Station. v.14, no.3. February 1932. p.142-146. Profitable increases in yields and higher percentages of first grade tubers secured.

Poultry.

- Better feeding equipment for chicks. By H.L. Richardson. 1931. 4p. Maine. College of Agriculture. Extension Service. Circular no.107.
- Heating-humidifying device for incubators. By George Wishart and A. R. Baird. Science. v.74, no.1915. September 11, 1931. p.269.

Poultry houses.

- Modern housing of poultry. By C.F. Anderson. Journal of the Department of Agriculture of South Australia. v.35, no.5. December 15, 1931. p.530-542.

Poultry houses. (Cont'd)

Poultry equipment for Four-H Poultry Club Members. By H.G. Ware and W. P. Albright. 1931. 12p. Oklahoma. Agricultural and Mechanical College. Extension Service. Circular no.282.

Revolution in hen-coops. By D.C. Kennard. Farm Journal. v.56, no.3. March 1932. p.14,24-25. Individual wire cage for each pullet.

Power plants.

First major low-head power plant in the West--Rock Island. By W.D. Shannon. Engineering News-Record. v.108, no.7. February 18, 1932. p.240-244.

Standard symbols for power plant diagrams: Flow and heat balance diagrams simplified by graphical symbols recommended by International Electrotechnical Commission. Power Plant Engineering. v.36, no.4. February 15, 1932. p.159.

Refrigeration.

Air conditioning applied to cold storage -- and a new psychrometric chart. By Claude A. Bulkley. Refrigerating Engineering. v.23, no.2. February 1932. p.97-102.

Increasing profits by application of technical knowledge to the manufacture and use of ice. By H.L. Lincoln. Ice and Refrigeration. v.82, no.1. January 1932. p.13-18. Detailed discussion of ways and means of making use of research. Cooling of milk and precooling of fruit. Drawing showing interior of pre-iced car for carrying fruit.

Preservation freezing: Some effects on quality of fruits and vegetables. By J. G. Woodroof. 1931. 23p. Georgia. Agricultural Experiment Station. Bulletin 168.

Refrigerator car surface temperature. By W.J. Hukill. A.S.R.E. Convention preprint. January 26, 1932. p.3-6, 8.

Reservoirs.

Sealing a leaking reservoir in Italian Appenines. By B.C. Collier. Engineering News-Record. v.108, no.8. February 25, 1932. p.293-294. Crevassed and permeable rock in reservoir of hydro-electric plant on the River Ripa resisted waterproofing operations until virtually lined with gunite.

Roofs.

Production and use of galvanized roofing sheets. By G.C. Bartolls and K.J. T. Ekblaw. Agricultural Engineering. v.13, no.3. February 1932. p.47-50.

Rope.

How wire-rope construction affects selection. By A.S. Rairden. Engineering News-Record. v.108, no.8. February 25, 1932. p.287-291. Better understanding of wire-rope types and their relative resistance to load, bonding, abrasion and crushing will make possible important savings in wire-rope bills.

Wire rope stress elimination. By Edward J. Kunze. Power Plant Engineering. v.36, no.4. February 15, 1932. p.165-166. Internal stresses; Torsional stress may be reduced; Heat treatment removes internal stresses.

Sewage and sewage disposal.

Farm home sanitation. By C.V. Phagan and J. W. Carpenter, Jr. 1932. 16p. Oklahoma. Agricultural and Mechanical College. Extension Service. Circular no.289.

Soils.

Importance of soil conservation. By H.H. Bennett. 1931. 12p. Statement outlining seriousness of soil erosion and necessity for combatting evil. North Carolina Agricultural Experiment Station Cooperating with U. S. Department of Agriculture.

Some mysteries of the soil. By Dr. H.J. Wheeler. Rural New Yorker. v.91, no.5201. February 27, 1932. p.198-199. Types of soil, studying soil particles, sedimentary and residual materials, peat soils, test plots, subsoils, loess soils, effect of climate on soils.

Studies on the dispersion procedure used in the hydrometer method for making mechanical analysis of soils. By George John Bouyoucos. Soil Science. v.33, no.1. January 1931. p.21-26.

Spraying and dusting.

County spray ring: Shelby County, Tennessee, is pleased with the results. By L. R. Noel. Southern Agriculturist. v.61, no.12. December 1931. p.3, 22.

Steam.

Steam chart for second-law analysis: Study of thermo-dynamic availability in the steam power plant. By J.H. Keenan. Mechanical Engineering. v.54, no.3. March 1932. p.195-204.

Storage houses and cellars.

Steuben County potato storage cellar: There is more to it than just a covering over a hole in the ground. By Seymour Bridge. American Agriculturist. v.129, no.2. January 9, 1932. p.3.

Tobacco.

Tobacco fertilizer recommendations. American Fertilizer. v.75, no.8. October 10, 1931. p.34-36. Agronomists adopt recommendations with reference to the fertilization of flue cured, sun cured and shipping tobacco grown on average soils in Virginia, North Carolina, South Carolina and Georgia for 1932.

Tractors.

Allis-Chalmers offers Model L. Implement and Tractor Trade Journal. v.47, no.5. February 27, 1932. p.12.
• New track-type tractor has six cylinder power plant, six forward speeds and new flexibility features in crawler members.

Diesel engine designed for tractor service. By C.G.A. Rosen. Agricultural Engineering. v.13, no.1. January 1932. p.14-18.

It's universal in name and use. Implement and Tractor Trade Journal. v.47, no.6. March 12, 1932. p.26, 28.
Minneapolis - Moline announces new general purpose tractor and equipment for diversified farming.

New Minneapolis - Moline universal tractor. Farm Implement News. v.53, no.8. February 25, 1932. p.16-17.

Tractor is king in Soviet Russia, leading huge automotive plans. By Walter L. Carver. Automotive Industries. v.66, no.10. March 5, 1932. p.375-378.

Treat your tractor to the kind of care that pays. By F.E. Kirby. Furrow. v.37. February - March 1932. p. 3, 10. Grit is greatest enemy of long life, low-cost power.

Trial of the Miller "non-zlip" tractor wheels. Implement and Machinery Review. v.57, no.682. February 1, 1932. p.990-991. Available in various sizes for different makes and types of tractors. Consists of central disc arranged to fit on to standard axle of ordinary wheel tractor and having angle brackets fitted to it in such a way that these angle brackets are made to receive fixing bolts of necessary cross cloats as latter are slid by means of notches of openings cut in them on to periphery of disc.

Water.

Progress on New Mexico control of underground water supplies: Legal flaw is corrected in law making underground waters subject to appropriations. Engineering News-Record. v.108, no.9. March 3, 1932. p.325.
State funds available for plugging leaking wells in Roswell artesian basin.

Water power.

Developing water power on the Makelumne river. Engineering News-Record. v.108, no.10. March 10, 1932. p.350-353. Salt Springs rock-fill dam provides main storage resulting in 171,000 kva. of power installation in series of five plants. Concrete flume 21 miles long conveys water to main Tiger Creek plant. Program permits rehabilitation of historic old Electra plant.

Water supply.

Planning the farm water system. By E.T. Leavitt. Northwest Farm Equipment Journal. v.46, no.2. February 1932. p.46-47.

Practical handbook of water supply. By Frank Dixey. London. Thomas Murby & Co., 1931. 571p.

South Branch project: A high level water supply for the Northern Metropolitan district. November 1931. 1931. 77p. New Jersey. Water Policy Commission. Special report no.3..

Weather.

Weather cycles and their causes. By Halbert P. Gillette. Water Works and Sewerage. v.79, no.3. March 1932. p.95-98. Mainly an abridgment of paper read before American Meteorological Society, June 18, 1931.

Weeds.

Chemical weed killers. By M.W.Talbot. 1931. 9p. mimeographed. U.S. Bureau of Plant Industry. Discussion of four types of substances., chlorates, oils, common salt, and soluble arsenicals.
